WORK EXPERIENCES 💼

CODEGYM HUÉ 📅 07/2020 - 01/2021

Intern

- During the 6 months of school, I have improved markedly each month.
- After the first month, I have improved my problem solving mind, got acquainted and applied basic knowledge about HTML, CSS, Javascript to write a basic static web page. I learned the Github basics for source code management.
- After the second month, I gained quite a bit of basic knowledge of Java Core. Has done 1 student management application running on the Console window.
- Next month, I know how to combine MySQL and Java J2EE database to make the Miss Vietnam competition management web application.
- In the last 2 months, I have grasped the basics of Spring Freamwork, the new database management system is Postgresql, and implemented the team project of Building a sales management website. In addition, I learned by myself how to deploy Java web applications to Heroku.

BÁNH MỲ PEWPEW 📅 11/2018 - 04/2020

Staff – Sales

- I have improved the spirit of serious, responsible work, enhanced communication and teamwork skills, practiced persistence, high concentration and under great pressure.

FPTSHOP HUÉ 📅 08/2017 - 02/2018

Sale and Technical

- Get familiar with the professional working environment, high pressure
- Cultivate communication skills, persuade customers

EDUCATION 🎓

CODEGYM HUÉ 📅 07/2020 - 01/2021

OUTSTANDING PROJECT 📄

✎ WEBSITE: MANAGEMENT OF SALES -

- Description: Website for small store can create, save, order, manage store sales.

- Homepage: https://bit.ly/3ogD1jm
- Admin page: http://bit.ly/36gnLNa
- Account admin: admin@gmail.com; Password @ 123
- Link Github: http://bit.ly/2KR4Eln
- Language: Java, Javascript ES6
- Front-end: Bootstrap 4, CSS3, HTML5, template Admin: Gentelella-master, template Login: Login_v16
- Technology: Spring Boot, Spring Security, Ajax, jQuery, Thymeleaf, JPA, Restful API
- Database: PostgreSQL
- Source management: Github
- Team: 1 lead, 1 developer (leader divides the work and manages the code through Github)
- Time: 25 days
- I did:
  - Participate in the design of Database, Product Backlog, project structure.
  - Search for some templates, design sales interface, order management interface, print / save and export orders.
  - CRUD 8/17 tables of the project.
  - Create registration form for site visitors.
  - Config Spring Security
  - Product search function.
  - Functions to create, export, save purchase orders ..
  - Function to upload files for the application.
  - Validate
  - Offer Ajax asynchronous handling solutions.
  - Deploy the application to Heroku.
- Knowledge gained: Knowing how to work in groups through Github, knowing how to handle asynchronously in Ajax, knowing how to use Spring Security to perform login, know how to validate forms for both front-end and back- end, know how to upload files to the server, know how to place an order. Get a better understanding of the MVC model.

✎ WEBSITE: MISS VIETNAM -

- Description: The website manages Miss Vietnam registration records
- Homepage: http://bit.ly/3t0H6vO
- Admin page: http://bit.ly/3a4rsXv
- Account admin: admin; Password @ 123
- Link Github: http://bit.ly/3cdCYCt
- Time: 10 days
- Language: Java, Javascript ES6
Front-end: JSP / JSTL, HTML5 / CSS3, Bootstrap 4, template AdminLTE
- Technology: Servlet, jQuery
Database: Postgresql
- Team: individuals
- I did:
  - Validate(front-end, back-end)
  - Participate in the design of Database, Product Backlog, project structure.
  - CRUD 4 tables
  - Paging with back-end
- Knowledge gain : Know how to paging with back-end. How to dump data from database into JSP using Java Servlet.
